

# 2024 Pharmacy Guide

Most prescribed medications  
in workers' compensation

**MyMatrixx**  
By EVERNORTH

Brand to Generic Reference Guide Included

# Introduction

This guide provides information on some of the most prescribed medications in workers' compensation. The intent is to provide a resource for claims professionals that allows easy access to information regarding indications and generic availability, which is subject to change.

Medications are organized by an overall general therapeutic category and then a more specific group within the category. Within each group, medications are listed by generic name. This is modified from the industry standard of listing the brand version first to better reflect that most drugs dispensed are now generic. Also included are brand name examples, generic availability and possible therapeutic uses of each medication.

Therapeutic use includes both labeled and off-label use but is not exhaustive. Some medications are listed as a One Drug Review candidate. This recommendation may change upon further review of an individual medication regimen.

The MyMatrixx® by Evernorth clinical team is available to answer questions related to a patient's medication regimen. In some instances, a recommendation may be made to conduct a One Drug Review or a more comprehensive Clinical and Safety Evaluation (CASE Rx)®. Both MyMatrixx programs include outreach to the prescriber to discuss the use of alternative medications and they may incur a charge.

This guide is not intended and should not be used or relied upon for the purposes of prescribing or using a product. Inclusion of a specific medication does not indicate its preference as a treatment option, it is solely for reference purposes. The trademarks and other product names listed in this guide are the property of their respective companies.

**The MyMatrixx clinical team is available to answer questions related to a patient's medication regimen. Contact them at [clinical@mymatrixx.com](mailto:clinical@mymatrixx.com).**

# Medications by general therapeutic categories

## Anti-inflammatories & analgesics

Pain medications and anti-inflammatories are some of the most common medications utilized in workers' compensation. This category includes corticosteroids, non-steroidal anti-inflammatory drugs (NSAIDs), opioids, topical analgesics/ anesthetics and migraine products.

### Corticosteroids

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Methylprednisolone	<b>Medrol®</b>	Yes	<b>Inflammation</b>	No
Prednisone	<b>Deltasone, Rayos®</b>	Yes (for Deltasone)	<b>Inflammation</b>	No

### Migraine products

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Atogepant	<b>Qulipta®</b>	No	<b>Headaches</b>	No
Erenumab-aooe	<b>Aimovig®</b>	No	<b>Headaches</b>	No
Galcanezumab-gnlm	<b>Emgality®</b>	No	<b>Headaches</b>	No
Rimegepant Sulfate	<b>Nurtec®</b>	No	<b>Headaches</b>	No
Sumatriptan Succinate	<b>Imitrex, Onzetra®, Zembrace®</b>	Yes	<b>Headaches</b>	Yes (for Onzetra and Zembrace)
Ubrogepant	<b>Ubrelvy®</b>	No	<b>Headaches</b>	No

### NSAIDs & non-narcotic analgesics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Acetaminophen	<b>Tylenol®</b>	Yes	<b>Pain management</b>	No
Aspirin	<b>Aspirin</b>	Yes	<b>Pain management</b>	No
Celecoxib	<b>Celebrex®</b>	Yes	<b>Pain management</b>	No
Diclofenac Potassium	<b>Cataflam®, Lofena®, Zipsor®, Cambia®</b>	Yes	<b>Pain management</b>	Yes (for Zipsor and Cambia)
Diclofenac Sodium	<b>Voltaren®-XR</b>	Yes	<b>Pain management</b>	No
Etodolac	<b>Lodine™</b>	Yes	<b>Pain management</b>	No
Ibuprofen	<b>Motrin®, Advil®</b>	Yes	<b>Pain management</b>	No
Ketorolac Tromethamine	<b>Toradol®</b>	Yes	<b>Pain management</b>	No
Meloxicam	<b>Mobic®, Vivlodex</b>	Yes	<b>Pain management</b>	Yes (for Vivlodex)
Nabumetone	<b>Relafen®</b>	Yes	<b>Pain management</b>	No
Naproxen	<b>Aleve®, Naprosyn®, Naprelan®</b>	Yes	<b>Pain management</b>	Yes (for Naprelan)

## Opioids

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Acetaminophen w/ Codeine	<b>Tylenol w/ Codeine</b>	Yes	<b>Pain management</b>	No
Buprenorphine	<b>Butrans<sup>®</sup>, Belbuca<sup>®</sup></b>	Yes (for Butrans)	<b>Pain management</b>	No
Fentanyl	<b>Duragesic<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Hydrocodone-Acetaminophen	<b>Norco<sup>®</sup>, Vicodin<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Hydromorphone HCl	<b>Dilaudid<sup>®</sup>, Exalgo<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Methadone HCl	<b>Dolophine<sup>®</sup>, Methadose<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Morphine Sulfate	<b>MS IR, MS Contin<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Oxycodone	<b>OxyContin<sup>®</sup>, Xtampza<sup>®</sup>, Roxicodone<sup>®</sup></b>	Yes (for Roxicodone)	<b>Pain management</b>	No
Oxycodone w/ Acetaminophen	<b>Percocet<sup>®</sup></b>	Yes	<b>Pain management</b>	No
Tapentadol HCl	<b>Nucynta<sup>®</sup>, Nucynta ER</b>	No	<b>Pain management</b>	No
Tramadol HCl	<b>Ultram<sup>®</sup></b>	Yes	<b>Pain management</b>	No

## Opioid antidotes

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Naloxone HCl	<b>Narcan<sup>®</sup>, Kloxxado<sup>®</sup>, Zimhi<sup>®</sup></b>	Yes (for Narcan)	<b>Opioid overdose</b>	No

## Topical analgesics/anesthetics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Diclofenac Epolamine	<b>Flector<sup>®</sup></b>	No	<b>Topical pain management</b>	No
Diclofenac Sodium	<b>Voltaren<sup>®</sup> Gel, Pennsaid<sup>®</sup>, Solaraze<sup>®</sup></b>	Yes	<b>Topical pain management</b>	Yes (for Pennsaid and Solaraze)
Lidocaine	<b>Lidoderm<sup>®</sup>, ZTlido<sup>®</sup>, Aspercreme<sup>®</sup></b>	Yes (for Lidoderm)	<b>Topical pain management</b>	Yes (for 5% patch)
Various Combinations (may include lidocaine, capsaicin, menthol, camphor, methyl salicylate, and/or others)	<b>Biofreeze<sup>®</sup>, Tiger Balm<sup>®</sup>, LidoPro, Terocin, New Terocin, Icy Hot<sup>®</sup>, Bengay<sup>®</sup>, Lidothol, Diclona</b>	Yes	<b>Topical pain management</b>	Yes

## Neuromuscular medications

This category includes anticonvulsants and skeletal muscle relaxants. Anticonvulsants are used for various seizure disorders but may often be used to manage neuropathic pain. Skeletal muscle relaxants are used to treat muscle spasms and spasticity.

### Anticonvulsants

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Clonazepam	Klonopin®	Yes	Anxiety; seizure disorders	No
Gabapentin	Neurontin®, Gralise®	Yes	Neuropathic pain	No
Pregabalin	Lyrica®, Lyrica CR	Yes	Neuropathic pain	Yes
Topiramate	Topamax®, Qudexy®, Trokendi	Yes	Seizure disorders; headaches; neuropathic pain	No

### Skeletal muscle relaxants

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Baclofen	Fleqsuvy®, Lyvispah®, Ozobax® DS	Yes	Muscle spasms	No
Carisoprodol	Soma®	Yes	Muscle spasms	No
Cyclobenzaprine HCl	Flexeril, Fexmid®, Amrix®	Yes	Muscle spasms	Yes (for Amrix and 7.5 mg tablet)
Metaxalone	Skelaxin®	Yes	Muscle spasms	No
Methocarbamol	Robaxin®	Yes	Muscle spasms	No
Tizanidine HCl	Zanaflex®	Yes	Muscle spasms	No

## Psychotherapeutic medications

These medications are used to treat various psychological conditions including anxiety, depression and insomnia. Several antidepressants may also be utilized in the management of chronic or neuropathic pain.

### Antianxiety agents

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Alprazolam	<b>Xanax<sup>®</sup>, Xanax XR<sup>®</sup></b>	Yes	<b>Anxiety</b>	No
Buspirone HCl	<b>BuSpar<sup>™</sup></b>	Yes	<b>Anxiety</b>	No
Diazepam	<b>Valium<sup>®</sup></b>	Yes	<b>Anxiety</b>	No
Lorazepam	<b>Ativan<sup>®</sup>, Loreev XR<sup>®</sup></b>	Yes (for Ativan)	<b>Anxiety</b>	No
Hydroxyzine	<b>Vistaril<sup>®</sup></b>	Yes	<b>Anxiety</b>	No

### Antidepressants

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Amitriptyline HCl	<b>Elavil<sup>®</sup></b>	Yes	<b>Depression; neuropathic pain</b>	No
Bupropion HCl	<b>Wellbutrin<sup>®</sup>, Forfivo<sup>®</sup></b>	Yes (for Wellbutrin)	<b>Depression</b>	No
Duloxetine HCl	<b>Cymbalta<sup>®</sup></b>	Yes	<b>Depression; chronic pain</b>	Yes
Escitalopram Oxalate	<b>Lexapro<sup>®</sup></b>	Yes	<b>Depression</b>	No
Fluoxetine HCl	<b>Prozac<sup>®</sup></b>	Yes	<b>Depression</b>	No
Nortriptyline HCl	<b>Pamelor</b>	Yes	<b>Depression; neuropathic pain</b>	No
Sertraline HCl	<b>Zoloft<sup>®</sup></b>	Yes	<b>Depression</b>	No
Trazodone HCl	<b>Desyrel<sup>®</sup></b>	Yes	<b>Depression; insomnia</b>	No
Venlafaxine HCl	<b>Effexor<sup>™</sup></b>	Yes	<b>Depression; neuropathic pain</b>	No

### Antipsychotics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Aripiprazole	<b>Abilify<sup>®</sup></b>	Yes	<b>Depression; schizophrenia</b>	Yes
Quetiapine Fumarate	<b>Seroquel<sup>®</sup>, Seroquel XR<sup>®</sup></b>	Yes	<b>Depression; schizophrenia</b>	No

### Sleep aids

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Eszopiclone	<b>Lunesta<sup>®</sup></b>	Yes	<b>Insomnia</b>	No
Zolpidem Tartrate	<b>Ambien<sup>®</sup>, Ambien CR<sup>®</sup></b>	Yes	<b>Insomnia</b>	No

## Cardiovascular & respiratory medications

These medications may be used for a variety of conditions affecting the cardiovascular, respiratory and circulatory systems. This would include hypertension, high cholesterol, asthma, obstructive lung disease and others. Medications from this class are more likely to be related to certain presumptive claims.

### Antiasthmatics & bronchodilators

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Albuterol Sulfate	<b>Ventolin<sup>®</sup>, ProAir<sup>®</sup>, Proventil<sup>®</sup></b>	Yes (for ProAir and Proventil)	<b>Asthma and COPD</b>	No
Budesonide-Formoterol Fumarate Dihydrate	<b>Symbicort<sup>®</sup>, Breynta<sup>™</sup></b>	Yes	<b>Asthma and COPD</b>	No
Fluticasone-Salmeterol	<b>Advair<sup>®</sup>, Wixela Inhub<sup>®</sup>, AirDuo<sup>®</sup></b>	Yes (for Advair Diskus)	<b>Asthma and COPD</b>	No
Ipratropium-Albuterol	<b>Combivent<sup>®</sup></b>	No	<b>Asthma and COPD</b>	No
Montelukast Sodium	<b>Singulair<sup>®</sup></b>	Yes	<b>Asthma and COPD</b>	No
Tiotropium Bromide Monohydrate	<b>Spiriva<sup>®</sup></b>	Yes	<b>Asthma and COPD</b>	No

### Anticoagulants

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Apixaban	<b>Eliquis<sup>®</sup></b>	No	<b>Postoperative prophylaxis for blood clots</b>	No
Rivaroxaban	<b>Xarelto<sup>®</sup></b>	No	<b>Postoperative prophylaxis for blood clots</b>	No

### Antihyperlipidemics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Atorvastatin Calcium	<b>Lipitor<sup>®</sup></b>	Yes	<b>High cholesterol</b>	No
Evolocumab	<b>Repatha<sup>®</sup></b>	No	<b>High cholesterol</b>	No
Rosuvastatin Calcium	<b>Crestor<sup>®</sup></b>	Yes	<b>High cholesterol</b>	No

## Antihypertensives

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Lisinopril	<b>Zestril</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No
Losartan Potassium	<b>Cozaar</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No

## Beta blockers

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Carvedilol	<b>Coreg</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No
Propranolol HCl	<b>Inderal</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No
Metoprolol	<b>Toprol-XL</b> <sup>®</sup> , <b>Lopressor</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No

## Calcium channel blockers

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Amlodipine Besylate	<b>Norvasc</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No

## Diuretics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Furosemide	<b>Lasix</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No
Hydrochlorothiazide	<b>Microzide</b> <sup>®</sup>	Yes	<b>Various cardiovascular conditions, including high blood pressure</b>	No

## Gastrointestinal medications

The most common medications in this category treat nausea and vomiting, constipation and stomach ulcers. These are often used to manage or prevent side effects of other common medications used to treat the injury.

### Antiemetics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Ondansetron	<b>Zofran®</b>	Yes	<b>Nausea &amp; vomiting</b>	Yes

### Laxatives

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Docusate Sodium	<b>Colace®, Dulcolax®</b>	Yes	<b>Constipation</b>	No
Methylnaltrexone Bromide	<b>Relistor®</b>	No	<b>Opioid-induced constipation</b>	Yes
Naloxegol Oxalate	<b>Movantik®</b>	No	<b>Opioid-induced constipation</b>	Yes
Polyethylene Glycol 3350	<b>MiraLAX®</b>	Yes	<b>Constipation</b>	No
Sennosides-Docusate Sodium	<b>Senna S, Senexon-S</b>	Yes	<b>Constipation</b>	No

### Ulcer drugs

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Esomeprazole Magnesium	<b>Nexium®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No
Famotidine	<b>Pepcid®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No
Lansoprazole	<b>Prevacid®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No
Omeprazole	<b>Prilosec®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No
Pantoprazole Sodium	<b>Protonix®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No
Rabeprazole Sodium	<b>AcipHex®</b>	Yes	<b>Gastric ulcers; NSAID-induced ulcer prophylaxis</b>	No

## Anti-infectives

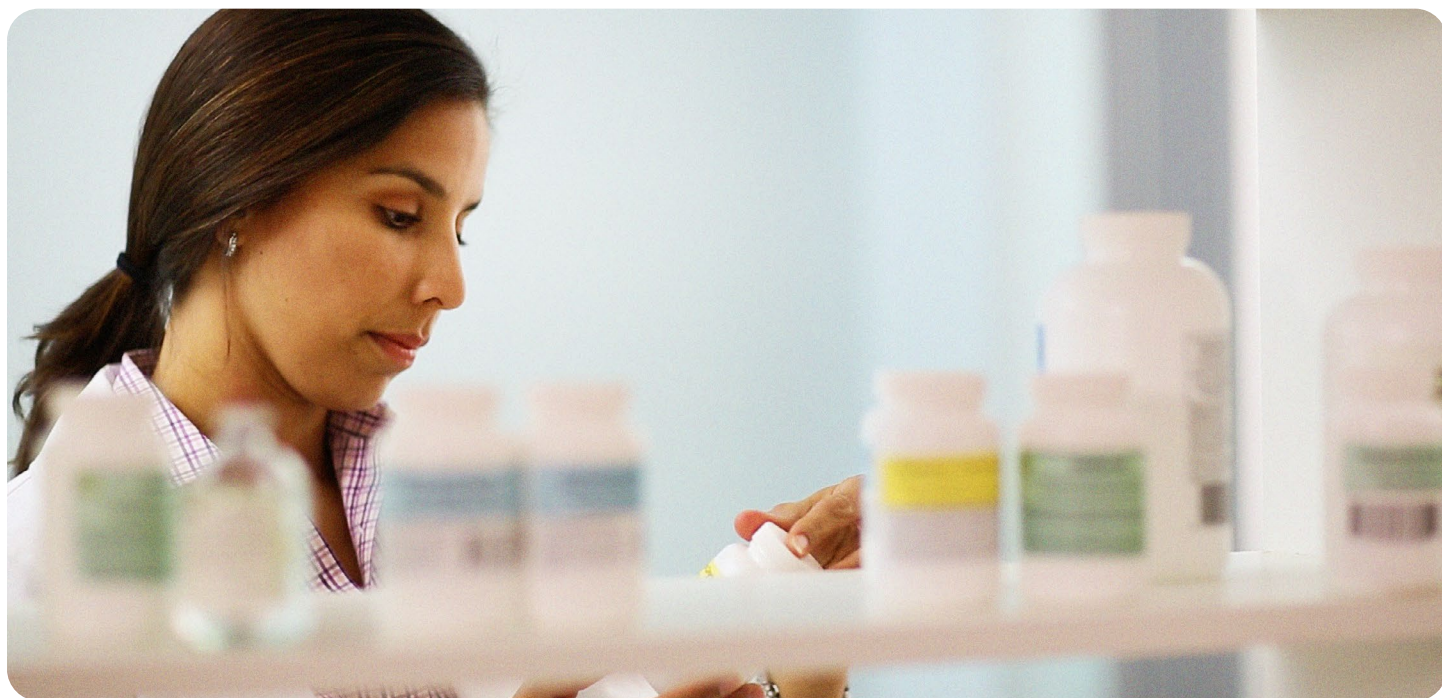

This category is used to manage a variety of infectious diseases that may arise as part of an injury. Antibiotics are used to treat bacterial infections and antivirals treat viral infections. Needle-stick injuries or other exposures to infected blood would warrant treatment for post-exposure prophylaxis with an HIV antiretroviral medication.

### Antibiotics

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Cephalexin	<b>Keflex®</b>	Yes	<b>Various bacterial infections</b>	No
Sulfamethoxazole-Trimethoprim	<b>Bactrim</b>	Yes	<b>Various bacterial infections</b>	No
Amoxicillin & Potassium Clavulanate	<b>Augmentin®</b>	Yes	<b>Various bacterial infections</b>	No

### Antivirals

GENERIC NAME	BRAND EXAMPLE(S)	GENERIC AVAILABLE	THERAPEUTIC USE	ONE DRUG REVIEW
Dolutegravir Sodium	<b>Tivicay®</b>	No	<b>Post-exposure prophylaxis (needle-stick injuries)</b>	No
Emtricitabine-Tenofovir Disoproxil Fumarate	<b>Truvada®</b>	Yes	<b>Post-exposure prophylaxis (needle-stick injuries)</b>	No
Raltegravir Potassium	<b>Isentress®</b>	No	<b>Post-exposure prophylaxis (needle-stick injuries)</b>	No

## Brand to generic index

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Abilify</b>	Aripiprazole	Antipsychotic	Depression; schizophrenia
<b>AcipHex</b>	Rabeprazole Sodium	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>Advair</b>	Fluticasone-Salmeterol	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Advil</b>	Ibuprofen	NSAID	Pain management
<b>Aimovig</b>	Erenumab-aooe	Migraine product	Headaches
<b>AirDuo</b>	Fluticasone-Salmeterol	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Aleve</b>	Naproxen	NSAID	Pain management
<b>Ambien, Ambien CR</b>	Zolpidem Tartrate	Sleep aid	Insomnia
<b>Amrix</b>	Cyclobenzaprine HCl	Skeletal muscle relaxant	Muscle spasms
<b>Aspercreme</b>	Various Menthol, Diclofenac Sodium, Capsaicin, Lidocaine products	Topical analgesic/Anesthetic	Topical pain management
<b>Aspirin</b>	Aspirin	Non-narcotic analgesic	Pain management
<b>Ativan</b>	Lorazepam	Antianxiety agent	Anxiety
<b>Augmentin</b>	Amoxicillin & Potassium Clavulanate	Antibiotic	Various bacterial infections
<b>Bactrim</b>	Sulfamethoxazole-Trimethoprim	Antibiotic	Various bacterial infections
<b>Belbuca</b>	Buprenorphine	Opioid	Pain management
<b>Bengay</b>	Various Menthol, Lidocaine, Camphor, Methyl Salicylate products	Topical analgesic/Anesthetic	Topical pain management
<b>Biofreeze</b>	Menthol	Topical analgesic/Anesthetic	Topical pain management
<b>Breyna</b>	Budesonide-Formoterol Fumarate Dihydrate	Antiasthmatics & bronchodilators	Asthma and COPD
<b>BuSpar</b>	Buspirone HCl	Antianxiety agent	Anxiety
<b>Butrans</b>	Buprenorphine	Opioid	Pain management
<b>Cambia</b>	Diclofenac Potassium	NSAID	Pain management
<b>Cataflam</b>	Diclofenac Potassium	NSAID	Pain management
<b>Celebrex</b>	Celecoxib	NSAID	Pain management

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Colace</b>	Docusate Sodium	Laxative	Constipation
<b>Combivent</b>	Ipratropium-Albuterol	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Coreg</b>	Carvedilol	Beta blocker	Various cardiovascular conditions, including high blood pressure
<b>Cozaar</b>	Losartan Potassium	Antihypertensive	Various cardiovascular conditions, including high blood pressure
<b>Crestor</b>	Rosuvastatin Calcium	Antihyperlipidemic	High cholesterol
<b>Cymbalta</b>	Duloxetine HCl	Antidepressant	Depression; chronic pain
<b>Deltasone</b>	Prednisone	Corticosteroid	Inflammation
<b>Desyrel</b>	Trazodone HCl	Antidepressant	Depression; insomnia
<b>Diclona, Diclona+</b>	Diclofenac Sodium-Lidocaine	Topical analgesic/Anesthetic	Topical pain management
<b>Dilaudid</b>	Hydromorphone HCl	Opioid	Pain management
<b>Dolophine</b>	Methadone HCl	Opioid	Pain management
<b>Dulcolax</b>	Docusate Sodium	Laxative	Constipation
<b>Duragesic</b>	Fentanyl	Opioid	Pain management
<b>Effexor</b>	Venlafaxine HCl	Antidepressant	Depression; neuropathic pain
<b>Elavil</b>	Amitriptyline HCl	Antidepressant	Depression; neuropathic pain
<b>Eliquis</b>	Apixaban	Anticoagulant	Postoperative prophylaxis for blood clots
<b>Emgality</b>	Galcanezumab-gnlm	Migraine product	Headaches
<b>Exalgo</b>	Hydromorphone HCl	Opioid	Pain management
<b>Fexmid</b>	Cyclobenzaprine HCl	Skeletal muscle relaxant	Muscle spasms
<b>Flector</b>	Diclofenac Epolamine	Topical analgesic/Anesthetic	Topical pain management
<b>Fleqsuvy</b>	Baclofen	Skeletal muscle relaxant	Muscle spasms
<b>Flexeril</b>	Cyclobenzaprine HCl	Skeletal muscle relaxant	Muscle spasms
<b>Forfivo</b>	Bupropion HCl	Antidepressant	Depression
<b>Gralise</b>	Gabapentin	Anticonvulsant	Neuropathic pain
<b>Icy Hot</b>	Various Menthol, Methyl Salicylate, Camphor, Capsaicin, Lidocaine products	Topical analgesic/Anesthetic	Topical pain management

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Imitrex</b>	Sumatriptan Succinate	Migraine product	Headaches
<b>Inderal</b>	Propranolol HCl	Beta blocker	Various cardiovascular conditions, including high blood pressure
<b>ISENTRESS</b>	Raltegravir Potassium	Antiviral	Post-exposure prophylaxis (needle-stick injuries)
<b>Keflex</b>	Cephalexin	Antibiotic	Various bacterial infections
<b>Klonopin</b>	Clonazepam	Anticonvulsant	Anxiety; seizure disorders
<b>Kloxxado</b>	Naloxone HCl	Opioid antidote	Opioid overdose
<b>Lasix</b>	Furosemide	Diuretic	Various cardiovascular conditions, including high blood pressure
<b>Lexapro</b>	Escitalopram Oxalate	Antidepressant	Depression
<b>Lidoderm</b>	Lidocaine	Topical analgesic/Anesthetic	Topical pain management
<b>LidoPro Ointment</b>	Methyl Salicylate-Lidocaine-Menthol-Capsaicin	Topical analgesic/Anesthetic	Topical pain management
<b>LidoPro Patch</b>	Methyl Salicylate-Lidocaine-Menthol	Topical analgesic/Anesthetic	Topical pain management
<b>Lidothol</b>	Lidocaine-Menthol	Topical analgesic/Anesthetic	Topical pain management
<b>Lipitor</b>	Atorvastatin Calcium	Antihyperlipidemic	High cholesterol
<b>Lodine</b>	Etodolac	NSAID	Pain management
<b>Lofena</b>	Diclofenac Potassium	NSAID	Pain management
<b>Lopressor</b>	Metoprolol Tartrate	Beta blocker	Various cardiovascular conditions, including high blood pressure
<b>Loreev XR</b>	Lorazepam	Antianxiety agent	Anxiety
<b>Lunesta</b>	Eszopiclone	Sleep aid	Insomnia
<b>Lyrica, Lyrica CR</b>	Pregabalin	Anticonvulsant	Neuropathic pain
<b>Lyvispah</b>	Baclofen	Skeletal muscle relaxant	Muscle spasms
<b>Medrol</b>	Methylprednisolone	Corticosteroid	Inflammation
<b>Methadose</b>	Methadone HCl	Opioid	Pain management
<b>Microzide</b>	Hydrochlorothiazide	Diuretic	Various cardiovascular conditions, including high blood pressure
<b>MiraLAX</b>	Polyethylene Glycol 3350	Laxative	Constipation
<b>Mobic</b>	Meloxicam	NSAID	Pain management

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Motrin</b>	Ibuprofen	NSAID	Pain management
<b>Movantik</b>	Naloxegol Oxalate	Laxative	Opioid-induced constipation
<b>MS IR, MS Contin</b>	Morphine Sulfate	Opioid	Pain management
<b>Naprelan</b>	Naproxen	NSAID	Pain management
<b>Naprosyn</b>	Naproxen	NSAID	Pain management
<b>Narcan</b>	Naloxone HCl	Opioid antidote	Opioid overdose
<b>Neurontin</b>	Gabapentin	Anticonvulsant	Neuropathic pain
<b>New Terocin</b>	Capsaicin-Menthol-Salicylate	Topical analgesic/Anesthetic	Topical pain management
<b>Nexium</b>	Esomeprazole Magnesium	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>Norco</b>	Hydrocodone-Acetaminophen	Opioid	Pain management
<b>Norvasc</b>	Amlodipine Besylate	Calcium channel blocker	Various cardiovascular conditions, including high blood pressure
<b>Nucynta, Nucynta ER</b>	Tapentadol HCl	Opioid	Pain management
<b>Nurtec</b>	Rimegepant Sulfate	Migraine product	Headaches
<b>Onzetra</b>	Sumatriptan Succinate	Migraine product	Headaches
<b>OxyContin</b>	Oxycodone	Opioid	Pain management
<b>Ozobax DS</b>	Baclofen	Skeletal muscle relaxant	Muscle spasms
<b>Pamelor</b>	Nortriptyline HCl	Antidepressant	Depression; neuropathic pain
<b>Pennsaid</b>	Diclofenac Sodium	Topical analgesic/Anesthetic	Topical pain management
<b>Pepcid</b>	Famotidine	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>Percocet</b>	Oxycodone w/ Acetaminophen	Opioid	Pain management
<b>Prevacid</b>	Lansoprazole	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>Prilosec</b>	Omeprazole	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>ProAir</b>	Albuterol Sulfate	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Protonix</b>	Pantoprazole Sodium	Ulcer drug	Gastric ulcers; NSAID-induced ulcer prophylaxis
<b>Proventil</b>	Albuterol Sulfate	Antiasthmatics & bronchodilators	Asthma and COPD

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Prozac</b>	Fluoxetine HCl	Antidepressant	Depression
<b>Qudexy</b>	Topiramate	Anticonvulsant	Seizure disorders; headaches; neuropathic pain
<b>Qulipta</b>	Atogepant	Migraine product	Headaches
<b>Rayos</b>	Prednisone	Corticosteroid	Inflammation
<b>Relafen</b>	Nabumetone	NSAID	Pain management
<b>Relistor</b>	Methylnaltrexone Bromide	Laxative	Opioid-induced constipation
<b>Repatha</b>	Evolocumab	Antihyperlipidemic	High cholesterol
<b>Robaxin</b>	Methocarbamol	Skeletal muscle relaxant	Muscle spasms
<b>Roxicodone</b>	Oxycodone	Opioid	Pain management
<b>Senna S, Senexon-S</b>	Sennosides-Docusate Sodium	Laxative	Constipation
<b>Seroquel, Seroquel XR</b>	Quetiapine Fumarate	Antipsychotic	Depression; schizophrenia
<b>Singulair</b>	Montelukast Sodium	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Skelaxin</b>	Metaxalone	Skeletal muscle relaxant	Muscle spasms
<b>Solaraze</b>	Diclofenac Sodium	Topical analgesic/Anesthetic	Topical pain management
<b>Soma</b>	Carisoprodol	Skeletal muscle relaxant	Muscle spasms
<b>Spiriva</b>	Tiotropium Bromide Monohydrate	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Symbicort</b>	Budesonide-Formoterol Fumarate Dihydrate	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Terocin</b>	Lidocaine-Menthol	Topical analgesic/Anesthetic	Topical pain management
<b>Tiger Balm</b>	Various Menthol, Camphor, Methyl Salicylate products	Topical analgesic/Anesthetic	Topical pain management
<b>Tivicay</b>	Dolutegravir Sodium	Antiviral	Post-exposure prophylaxis (needle-stick injuries)
<b>Topamax</b>	Topiramate	Anticonvulsant	Seizure disorders; headaches; neuropathic pain
<b>Toprol XL</b>	Metoprolol Succinate	Beta blocker	Various cardiovascular conditions, including high blood pressure
<b>Toradol</b>	Ketorolac Tromethamine	NSAID	Pain management

Brand example(s)	Generic name	Medication group	Therapeutic use
<b>Trokendi</b>	Topiramate	Anticonvulsant	Seizure disorders; headaches; neuropathic pain
<b>Truvada</b>	Emtricitabine-Tenofovir Disoproxil Fumarate	Antiviral	Post-exposure prophylaxis (needle-stick injuries)
<b>Tylenol</b>	Acetaminophen	Non-narcotic analgesic	Pain management
<b>Tylenol w/ Codeine</b>	Acetaminophen w/ Codeine	Opioid	Pain management
<b>Ubrelevy</b>	Ubrogepant	Migraine product	Headaches
<b>Ultram</b>	Tramadol HCl	Opioid	Pain management
<b>Valium</b>	Diazepam	Antianxiety agent	Anxiety
<b>Ventolin</b>	Albuterol Sulfate	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Vicodin</b>	Hydrocodone-Acetaminophen	Opioid	Pain management
<b>Vistaril</b>	Hydroxyzine	Antianxiety agent	Anxiety
<b>Vivlodex</b>	Meloxicam	NSAID	Pain management
<b>Voltaren Gel</b>	Diclofenac Sodium	Topical analgesic/Anesthetic	Topical pain management
<b>Voltaren-XR</b>	Diclofenac Sodium	NSAID	Pain management
<b>Wellbutrin</b>	Bupropion HCl	Antidepressant	Depression
<b>Wixela Inhub</b>	Fluticasone-Salmeterol	Antiasthmatics & bronchodilators	Asthma and COPD
<b>Xanax, Xanax XR</b>	Alprazolam	Antianxiety agent	Anxiety
<b>Xarelto</b>	Rivaroxaban	Anticoagulant	Postoperative prophylaxis for blood clots
<b>Xtampza</b>	Oxycodone	Opioid	Pain management
<b>Zanaflex</b>	Tizanidine HCl	Skeletal muscle relaxant	Muscle spasms
<b>Zembrace</b>	Sumatriptan Succinate	Migraine product	Headaches
<b>Zestril</b>	Lisinopril	Antihypertensive	Various cardiovascular conditions, including high blood pressure
<b>Zimhi</b>	Naloxone HCl	Opioid antidote	Opioid overdose
<b>Zipsor</b>	Diclofenac Potassium	NSAID	Pain management
<b>Zofran</b>	Ondansetron	Antiemetic	Nausea & vomiting
<b>Zoloft</b>	Sertraline HCl	Antidepressant	Depression
<b>ZTlido</b>	Lidocaine	Topical analgesic/Anesthetic	Topical pain management

# Glossary terms

## Clinical definitions

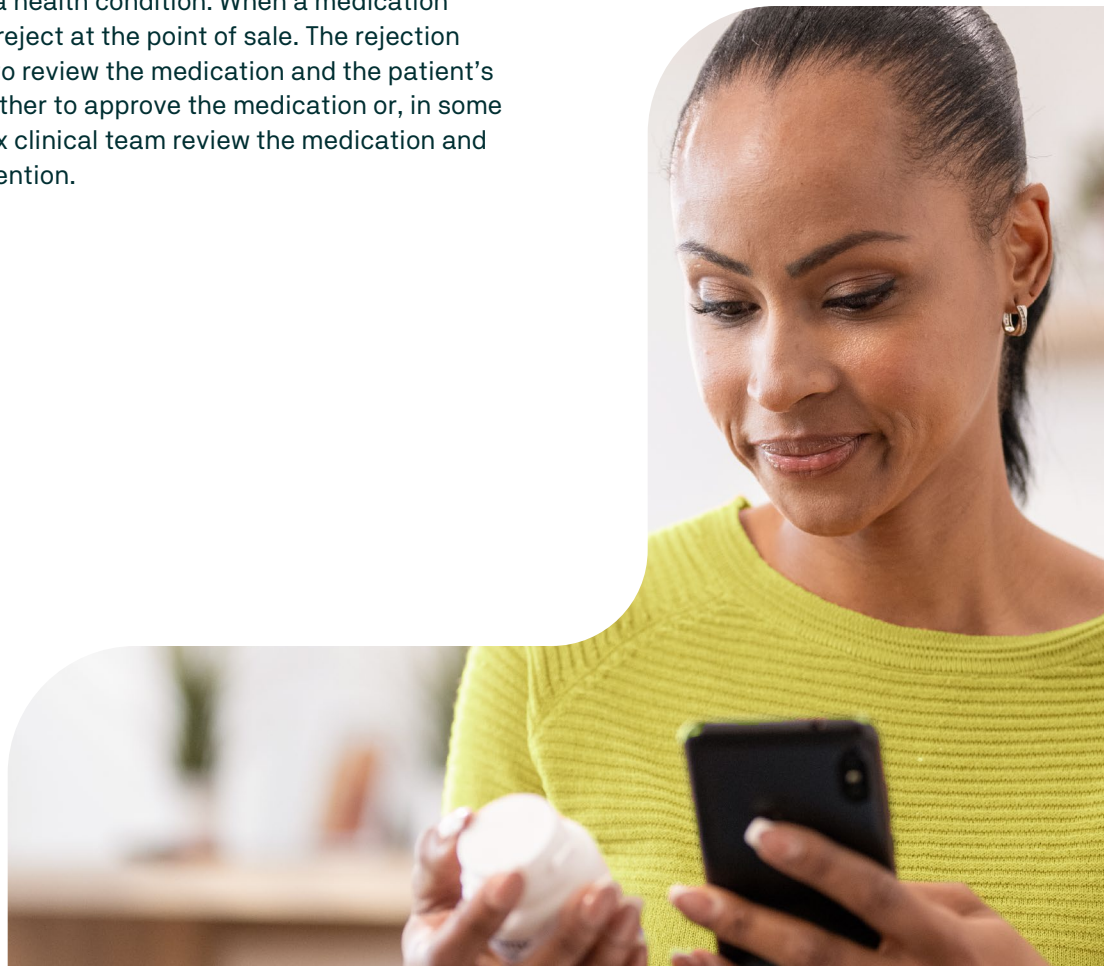

**Drug requiring prior authorization:** The medication that rejects and generates a prior authorization rejection.

**Therapeutic use:** Describes the most likely reason the medication is being used in the workers' compensation population. Includes the most used labeled (as approved by the U.S. Food and Drug Administration) and off-label indications in workers' compensation.

**Formulary:** A list of medications that do not require prior authorization. Conversely, it may be a list of medications that always require prior authorization. The development of a formulary is based on evaluations of efficacy, safety and cost-effectiveness of drugs.

**Intervention:** The act of contacting the prescriber to obtain more information and to determine if a different medication that is more cost-effective or therapeutically appropriate could be prescribed instead of the medication that requires a prior authorization. This includes determining which medications have been tried previously and the reason(s) they were discontinued.

**Prior authorization:** A review of a requested medication prior to dispensing. It is a feature used by insurance companies and other payers to help ensure the appropriate use of selected prescription drugs. Prior authorization programs are designed to prevent improper prescribing or use of certain drugs that may not be the best choice for a health condition. When a medication requires a prior authorization, it will reject at the point of sale. The rejection allows the claims professional time to review the medication and the patient's medical history before deciding whether to approve the medication or, in some cases, requesting that the MyMatrixx clinical team review the medication and medical history to perform an intervention.

## MyMatrixx products and programs

**Clinical and Safety Evaluation Rx (CASE Rx):** An intervention tool used by MyMatrixx at the request of the claims professional. CASE Rx® is a prescriber clinical intervention program that aims to improve therapeutic outcomes by providing objective and evidence-based assessments of prescription drug use by injured patients. This systematic review process ensures a comprehensive assessment. The program's primary focus is to identify and correct potential medication errors. Additionally, CASE Rx identifies potentially inappropriate or inefficient use of medications. Lastly, specific recommendations are made for lower cost, yet equally effective alternatives when opportunities exist.

A teleconference with a treating provider and a MyMatrixx clinical pharmacist may be utilized to help drive implementation of the CASE Rx interventions.

**One Drug Review:** An intervention tool used by MyMatrixx at the request of the claims professional. The One Drug Review provides the prescriber with a more cost-effective or therapeutically appropriate drug that may be considered as an alternative to the medication in question, as well as the evidence-based clinical rationale to support the recommendation.

One Drug Review findings and recommendations are first sent to the prescriber's office via fax. The document requests that the prescriber respond as to whether he or she agrees, disagrees or will discuss alternative medications with the patient. The One Drug Review fax also provides a prescriber signature line and an area for the prescriber to comment.
